DANIEL AGBONIFO

Data Analyst || Full-Stack Developer

+2348050542024 agbonifodaniel2@gmail.com https://agbonifo.github.io

"My speciality is transforming data into valuable insights and building dynamic, user-friendly websites. Whether uncovering trends through analysis or crafting seamless digital experiences, I deliver data-driven solutions tailored to meet your needs."

PERSONAL PROJECTS

- **Data Cleaning and Exploration with SQL:** In this project, I cleaned Nashville housing dataset in SQL to make it more usable for analysis. I also performed exploratory data analysis on covid-19 dataset.
- **Exploratory Data Analysis (EDA) with Python:** In this project, I performed Exploratory Data Analysis (EDA) on global population dataset, uncovering trends in population growth and density.
- **Excel Dashboard:** In this project, I cleaned and transformed bike sales dataset for consistency. I then created pivot tables and visualizations. These findings were compiled into a dashboard, showcasing key insights.
- **Power BI Dashboard:** In this project, I cleaned and transformed data professionals' survey dataset in Power BI Desktop for consistency, and created table, models and visualizations for detailed analysis. The insights were compiled into a dashboard and published on Power BI Service.
- **Todo List Web App:** In this project, I used HTML, CSS, JavaScript, EJS, Node.js, Express.js, and MongoDB to developed an intuitive task management website that allows users to manage day-to-day activities..
- **Note Keeping Web App:** In this project, HTML, CSS, JavaScript, React.js, Node.js, and MongoDB to developed a dynamic web application that enables users to create, read, update, and delete notes. It offers a seamless note-taking experience with full CRUD functionality.
